ALWAYS KEEP THIS MANUAL IN A SAFE PLACE.

SAFETY INSTRUCTIONS

- Read, understand, & follow all instructions in the Owner/Operators manual.
- Know the controls and how to stop the engine quickly in an emergency.
- Allow only responsible adults, who are familiar with the instructions in this manual, to operate the machine.
- Clear the area to be mowed of loose objects such as sticks, stones, bones, wire, toys, debris, etc., which could be picked up and thrown by the blades.
- DO NOT mow whilst people, especially children, or pets are in the mowing area.
- DO NOT mow either direction on slopes beyond 15 degrees (1 in 3.75).
- Exercise extreme caution on slopes.
- Reduce speed on slopes and in sharp turns to prevent overturning or loss of control.
- Start or stop slowly when on slopes.
- Mow up and down slopes, not across the slope.
- Stay alert for holes or bumps in the terrain and other hidden hazards.
- Watch out for traffic when crossing or operating the mower near roadways.
- Stop the blades rotating before crossing surfaces other than grass.
- When using attachments, never direct discharge of material toward bystanders nor allow anyone near the machine while it is in operation.
- Before leaving the operators position-
 - a] Disengage all clutches and secure cutting units;
 - b] Return drive pedal to neutral position and set the parking brake;
 - c] Stop the engine and remove the key.
- Disengage drive to attachments and stop engine-
 - a] Before refueling;
 - b] Before checking, cleaning or working on the mower;
 - c] After striking a foreign object (check the mower for damage and make repairs before restarting and operating the equipment);
 - d] If machine starts to vibrate abnormally (check immediately).
- Disengage drive to attachments when transporting or not in use.
- A mower operator should be in good physical and mental health and not under the influence of alcohol or any drug which might impair vision, co-ordination or judgment.
- Never mow while barefoot or wearing open sandals or thongs. Wear long trousers and heavy shoes.
- It is advisable to wear suitable eye protection when operating a mower.
- Mow only in daylight or good artificial light.
- Before using, always visually inspect to see that blades, bolts and cutter assembly are not worn or damaged. Replace worn or damaged blades and bolts in sets to preserve balance.
- Check all nuts, bolts, and screws often; always be sure the mower is in safe operating condition.
- Keep safety devices (guards and switches) in place and in working order.
- Never use the mower unless the guards provided by the manufacturer, are in position.
- Ensure any replacement parts used comply with the original manufacture's recommendations and specifications.
- Replace worn or faulty silencers.
- Keep machine free of grass, leaves or other debris, excessive oil, grease, or spilt fuel. These can be a fire hazard.
- Refuel outdoors only. Do not smoke while fueling engine. Never remove the cap of the fuel tank or add petrol while the engine is running or the engine is hot. Remove fuel cap slowly to relieve any tank pressure. If fuel is spilled, do not attempt to start the engine but move machine away from the area of the spill and avoid creating any source of ignition until fuel vapors have dissipated.
- Check for fuel leaks while refueling, before and while using the mower. If a fuel leak is found, do not start or run the engine until the fuel leak is fixed and spilled fuel is wiped away.
- Do not operate engine in a confined space where exhaust fumes (carbon monoxide) can collect.
- Always mount the mower from the left or the opposite side to the discharge chute.
- Start the engine carefully with the cutting means disengaged.
- Do not over-speed the engine or alter governor settings. Excessive speed is dangerous and shortens mower life.
- Stop the engine whenever you leave the mower, even for a moment.
- Store the mower in a well-ventilated room away from naked flames such as may be found in hot water heaters.
- Do not lend or sell the mower, without the owners/operators Manual.

INTRODUCTION

THANK YOU, for purchasing a COX Hydrostatic Drive, STOCKMAN 4500 Ride-on Mower. Proudly Manufactured by Cox Industries (Australia) Pty. Ltd..

READ THIS MANUAL carefully to learn how to operate safely and maintain your Ride-on Mower effectively.

Failure to follow Safety, Operating or Maintenance instructions in this manual could result in Death, Personal Injury or Equipment Damage.

THIS MANUAL IS PART OF YOUR RIDE-ON MOWER and should be supplied with this Ride-on Mower if you lend or sell this Ride-on Mower. This should also apply to the Engine Owners Manual.

CONVENTIONS

Measurements in this manual are given in metric units unless otherwise stated.

Right-hand and Left-hand, are determined by facing the direction of forward travel.

Direction of rotation is determined by looking into the components in motion parallel to the axis of rotation.

WRITE PRODUCT IDENTIFICATION NUMBERS

in the Owners Information Section of this manual. Accurately recording these numbers will assist your Cox Dealer when ordering spare parts or help in tracing the Ride-on Mower if it should be stolen. Store this manual in a secure place remote from the Ride-on Mower.

ENSURE YOU UNDERSTAND THE WARRANTY POLICY with regard to the responsibilities of operation, maintenance and ownership of this COX STOCKMAN Ride-on Mower.

THE INTENDED USE OF THIS RIDE-ON MOWER

is for customary mowing of Landscaped Parks, Gardens, Grounds, Sporting Fields, Road Verges, Golf Course Fairways, Orchards, Plantations, and Vineyards.

Strict adherence to the conditions of Operation, Maintenance, Service & Repair as specified by the manufacturer constitute essential elements for The Intended Use.

Use in any other way not specifically approved directly in writing by the manufacturer is considered as contrary to the intended use and will increase the risk of personal injury or property damage and is therefore considered as misuse for which the manufacturer accepts no responsibility as these increased risks must be accepted solely by the user.

Do Not Modify the Machine

without direct specific approval by the manufacturer as modification is considered contrary to the intended use and will increase the risk of personal injury or property damage and is therefore considered as misuse for which the manufacturer accepts no responsibility as these increased risks must be accepted solely by the user.

OPERATION, MAINTENANCE, SERVICE AND REPAIR

of this Ride-on Mower should be performed only by persons familiar with its characteristics and acquainted with the relevant Safety, Operating and maintenance instructions in this manual, as well as all relevant Statutory

Regulations in force at the place and time.

When your Ride-on Mower needs service or repair please remember your **Cox Dealer is an industry trained professional** who is supported by the personnel of the Sales and Marketing, Engineering, Production, Procurement, Parts Distribution, & Service Sections of the Manufacturer and is dedicated to your satisfaction.

THE INFORMATION INCLUDED IN THIS MANUAL

was considered correct at the time of approval for printing. Cox Industries (Australia) Pty Ltd reserves the right to change specifications or designs without notice or obligation.

GENERAL SAFETY INSTRUCTIONS

Training

Read, understand and follow all instructions in the Ride-on Mower and Engine Owner's/Operator's Manual as well as on Machine Safety Signs.

Keep up to date with and follow

all relevant statutory regulations in force at the place and time with regard to ownership, transport, operation, maintenance, service, and repair, disposal or sale of this machine.

Know the controls and the proper use of the Equipment as well as how to stop the Mowing Attachment, Machine Travel, and the Engine in an emergency.

All operators or users should seek and obtain professional and practical instruction.

Such instruction should emphasize:

The need for concentration when working with ride-on machines.

Control of a ride-on machine sliding on a slope will not be regained by application of the brake.

The main reasons for loss of control are:

- i) Insufficient wheel grip;
- ii) Being driven to fast;
- iii) Inadequate braking;
- iv) The type of machine is unsuitable for the task;
- v) Lack of awareness of the effect of ground conditions, especially slopes;
- vi) Incorrect hitching and load distribution.

Never allow children or people unfamiliar with these instructions to operate the Ride-on Mower.

Never carry passengers.

Never mow while people, especially children, or unrestrained animals are nearby.

Keep in mind that the operator or user is responsible for accidents or hazards occurring to other people or their property caused by this machine.

GENERAL SAFETY INSTRUCTIONS CONT.

Preparation

While operating, always wear substantial footwear (not open sandals) and long trousers.

Thoroughly inspect the area where the equipment is to be used and remove all objects which can be thrown by the machine.

WARNING – Petrol is highly flammable:

- Store fuel in containers specifically designed for this purpose;
- Refuel outdoors only;
- Do not smoke while refuelling;
- Add fuel before starting the engine;
- Never remove the cap of the fuel tank or add petrol while the engine is running or when the engine is hot;
- If petrol is spilled, do not attempt to start the engine but move the machine away from the area of spillage and avoid creating any source of ignition until petrol vapours have dissipated;
- Replace all fuel tank caps and container caps securely.

Replace faulty Mufflers.

Before using, always visually inspect to see that the cutter assembly, blades, and blade bolts are not worn or damaged.

Replace worn or damaged blades and bolts in sets to preserve balance.

Take care rotating one blade by hand as this can cause other blades to rotate.

Operation

Do not operate the engine in a confined space where dangerous carbon monoxide fumes can collect.

Operate the machine only in daylight or in good artificial light.

Before attempting to start the engine, disengage Power take off Clutch and depress clutch/brake pedal to ensure drive is disengaged to the transmission.

Do not use on slopes of more than 15 degrees (1 in 3.75 or 27%).

There is no such thing as a safe slope.

Travel on grass slopes requires particular care.

To guard against overturning:

- Do not stop or start suddenly when going up or downhill;
- Engage hydrostatic drive slowly;
- Always keep hydrostatic drive operating, especially when travelling downhill;
- Machine speeds should be kept low on slopes and during tight turns;
- Stay alert for humps and hollows and other hidden hazards;
- Never mow across the face of the slope.

Use care when pulling loads or

using heavy equipment:

- Use only approved hitch points;
- Limit loads to those you can safely control;
- Do not turn sharply;
- Use care when reversing;

Watch out for traffic when crossing or near roadways.

Stop the blades rotating before crossing surfaces other than grass.

When using the mowing attachment, never direct discharge of material towards bystanders nor allow anyone else near the machine while it is operating.

Never operate the machine with defective guards, or without all safety devices in place and operating correctly.

Do not change the engine governor settings or over speed the engine as excessive engine speed can increase the risk of personal injury.

Before leaving the operators position:

- Disengage the power take off clutch;
- Set the parking brake in the locked position.

Disengage drive to attachments when transporting, emptying the catcher, or not in use.

Disengage drive to attachments and stop engine before refuelling.

Disengage drive to attachments, stop engine, and remove the ignition key:

- Before leaving the machine unattended;
- Before clearing blockages or unclogging the chute;
- After striking a foreign object. (Inspect the machine for damage and make repairs before restarting or operating the damaged equipment);
- If the machine starts to vibrate abnormally. (Check immediately).

Disengage drive to attachments, stop engine, remove the ignition key, and disconnect the spark plug wires and battery positive lead before working on, maintaining, or servicing the machine.

Secure the mowing attachment in the full up position:

- Before clearing blockages or unclogging the chute;
- Before replacing the blades, or adjusting the tension of the blade bolts;
- Before placing any tools or any part of your person under the mowing attachment.

Turn the fuel off using the fuel shut off valve at the conclusion of operation.

Maintenance and Storage

Keep all nuts, bolts and screws tight to ensure the equipment is in safe working order.

Replace worn or damaged parts for safety.

Reduce the fire hazard, by keeping the engine, muffler, hydrostatic transaxle, battery compartment, and petrol storage area clear of grass, leaves, or excessive oil and grease.

Also ensure the mowing attachment drive belt can not come into contact with grass, sticks, and leaves built up on the top surface of the mowing attachment.

If the fuel tank has to be drained this should be done out outdoors.

Never store the machine with petrol in the tank inside a building where fumes can reach an open flame or spark.

Allow the engine to cool before storing the Ride-on Mower in any enclosure.

When the machine is to be parked, stored or left unattended raise the mowing attachment and secure it in the full up position.

UNPACKING INSTRUCTIONS

Unpacking Instructions

Inspect the shipping crate and contents for damage.

Position the shipping crate on a firm flat level surface with at least 3 meters distance from any obstruction to the end of the crate adjacent to the front of the tractor.

! Caution you can be seriously injured by the metal strapping which has sharp edges and can spring out when cut. Wear gloves when handling metal strapping.

! Caution you can be seriously injured by sharp nails protruding from the shipping crate.

Cut and remove the straps restraining the tractor to the ends of the shipping crate.

Remove the end of the shipping crate adjacent to front of the tractor.

Remove the plastic sheet covering the tractor.

Unlock the park brake knob by depressing the clutch/brake pedal (the pedal on the left side of the tractor). Pull the transaxle transmission pump bypass lever fully forward to bypass the transmission pump and allow the tractor to be pulled with less effort.

Pull the tractor from the shipping crate. Depress the brake pedal while lifting up on the park brake knob. Once the park brake knob is raised release the brake pedal and then the park brake knob.

The Park brake should now be locked on.

Push the transaxle transmission pump bypass lever fully rearward to engage the transmission pump and allow the tractor to be driven.

Remove the steering wheel, seat sub-assy, & other loose components from the packaging.

Dispose of all packaging material responsibly.

Do not leave the plastic sheet unrestrained, it can blow away to become a safety hazard.

PRE-DELIVERY INSTRUCTIONS

INTRODUCTION:

The purpose of this procedure is to ensure the dealer/distributor has assembled & made the necessary checks, & adjustments, before the mower is operational, and instructed the owner in its safe operation & maintenance. This procedure begins upon receiving the crated mower and is finalised once the mower has been either sold or leaves the dealer/distributors premises. This is the minimum amount of work required, however it should not be limited to only the areas detailed in this procedure.

RESPONSIBILITY:

It is the responsibility of the dealer/distributors to ensure that before a mower is delivered to a customer, it is in perfect operational condition.

PROCEDURE:

CHECK COMPONENTS SUPPLIED IN SEAT PROTECTION BAG

- ☐ Engine owners manual
- ☐ Owner/Operator manual
- ☐ Ignition keys (AM015)
- ☐ Steering wheel (SW14H)
- ☐ Roll Pin (DP10)
- ☐ Spring pull hook (13127)
- ☐ Tommy bar (AM007)
- ☐ Set Screws M8X20 (SH0820M) x 2
- ☐ Nuts M8 Nyloc (NM8NT) x 2
- ☐ Seat Springs x 2 (A163060)
- ☐ Spring Caps x 2 (A160231)
- ☐ Washer (W05M202) x 2
- ☐ Warranty Card
- ☐ Pre-delivery Instruction Sheet

ASSEMBLY:

TOOLS & EQUIPMENT REQUIRED:

Socket set containing 13mm a/f socket & extension 75mm (3") or longer. Spanner 13mm a/f. Hammer & 6mm or 1/4" pin punch.

Refer pictorial procedure provided.

STEERING WHEEL

To attach the steering wheel, align the hole in the steering wheel boss to the hole in the steering shaft and use a hammer and suitable punch to drive the DP10 roll pin through the steering wheel and shaft. Ensure that the pin is situated centrally in the steering wheel

boss and that the steering is free to turn.

Press the steering wheel center cover into place using hand pressure only.

HOURLMETER

Connect the black negative wire to the terminal supplied at the back of the hourmeter.

SEAT MOUNT & SEAT SPRINGS

Install the two seat springs using the screws, washers, nuts, to the seat slide frame, and tighten the screws, washers, and nuts. Install the Seat & Mounting to the seat slide frame using the Screws and Nuts. Attach seat switch wiring to seat switch.

CHECK TYRE PRESSURES & FLUID LEVELS:

TYRES

Before operation ensure that tyre pressures are equal on both sides. Uneven pressure can give an uneven finish when mowing and may cause damage to tyres and/or tubes.

The recommended pressure is:

Front 170kPa (24 P.S.I.). Rear 100kPa (15 P.S.I.)

BATTERY

This machine is fitted with a maintenance free battery.

ENGINE OIL

Before operation ensure that engine oil level is to the full mark on the dipstick. (Refer engine owners manual for procedure & if some oil needs to be added refer Engine owners Manual for Correct Grade).

FUEL

Ensure the fuel tap at the bottom left front side of fuel tank is turned to the on position before attempting to start engine. (Use unleaded fuel only).

CHECK OPERATION OF SAFETY SWITCHES:

STARTING

Clutch/Brake switch

With PTO (power take off) switch in disengaged position (down/off) attempt to start engine without the clutch/brake pedal depressed. **Engine should not start.**

PTO switch

Sit on seat with the clutch/brake pedal fully depressed and PTO switch engaged (On),

attempt to start engine. **Engine should not start.**

Key Switch

With PTO switch in down (disengaged/off) position & clutch/brake pedal fully depressed turn key switch to start position. **Engine should start.**

STOPPING

Seat switch

Sit on seat and start engine, engage cutter, (manual or electric control) and lift weight from seat.

Engine should stop.

Clutch/Brake switch

Sit on seat and start engine depress clutch/brake pedal and apply park brake, lift weight from seat.

Engine should continue to run.

Sit on seat with engine running and park brake off, clutch/brake pedal not depressed and lift weight from seat.

Engine should stop.

Key Switch

Sit on seat and start engine, turn key switch to stop position.

Engine should stop.

PRE-DELIVERY PARTS EXPLODED VIEW

ITEM	PART NUMBER	DESCRIPTION	QTY
1	A163060	Spring, Compression, Conical, Seat, Heavy	2
2		Sub-Assy, Seat, Sman 4500	1

OPERATING INSTRUCTIONS

IMPORTANT

RECOMMENDED FUEL

Unleaded fuel is recommended by all manufacturers of engines fitted to Cox products.

SAFETY SWITCHES

Before operating machine, ensure that all safety switches are operating correctly. Do not operate machine with faulty, missing or damaged safety switches.

BLADE WARNING

Do not use mowing attachment with broken or bent blades, damaged or worn bolts and nuts or damaged cutter disc, otherwise damage and premature wear will result from vibration. Replace blades, bolts and nuts only in pairs to maintain correct balance. Recommended blade nut torque is 36-40Nm. Do not over tighten.

Keep both feet and hands clear of the mowing attachment at all times while attempting to start or operate the machine.

WARNING DO NOT OPERATE WITHOUT MOWING ATTACHMENT DEFLECTOR FITTED & DOWN.

Reference to left or right hand side of machine is determined by sitting in the operating position on the machine.

Safety footwear is recommended when operating machine.

Reference to left or right hand side of machine is determined by sitting in the operating position on the machine.

Mount and dismount only from left hand side of machine.

Ensure machine has clutch/brake pedal fully depressed or parking brake engaged when attempting to start engine.

Never allow engine revs to exceed more than 3600 RPM.

**The Instruments,
the Controls and
their functions are
as follows;**

Key Switch-

Used to start and stop engine. Insert key, turn key all the way right to start (3rd) position to start engine. When key is released from start (3rd) position it will return to on | (2nd) position. Turn key all the way left to off O (1st) position to stop engine. Remove key from off O (1st) position to lock ignition switch.

PTO Switch-

Used to activate the electromagnetic clutch/brake to start (engage) and stop (disengage and brake) mowing attachment blades and allow starting of engine with mowing attachment blades disengaged from engine. With engine running at fast speed pull KNOB up to (ON) position to start (engage) mowing attachment blades. Push knob down to (OFF) position to stop (disengage and brake) mowing attachment blades.

Seat Switch-

Used to stop engine if operator is not on the seat (switch not depressed) & cutter engagement PTO switch is engaged (on) or the park brake switch is not depressed (park brake not locked on).

Clutch/Brake Pedal & Park Brake Switch-

Used to allow starting of the engine when depressed.

Used to stop engine when not depressed and seat switch is not depressed.

Hourmeter-

Used to indicate the number of hours the engine has operated.

Note:- Ignition switch must be in the on position for the hourmeter to display hours.

Engine Speed/Choke Control Lever-

Used to regulate engine speed and cutter speed also to engage/regulate/disengage the engine choke to assist in starting a cold engine. Push LEVER fully forward to engage the engine choke fully.

Pull LEVER back so front edge of LEVER is in line with the fast (rabbit) symbol on dash decal to disengage choke fully.

Pull LEVER back for slow engine and cutter speed and push LEVER forward to fast symbol on dash decal for fast engine and cutter speed.

Clutch/Brake Pedal-

Used to disengage drive to the transaxle and apply the brake to slow or stop machine travel in forward or reverse direction. Used to allow engagement of park brake in locked (on) position. Used to allow starting of engine. Used to release park brake from locked (on) position.

Depress PEDAL to apply brake. Depress PEDAL to allow raising of park brake knob to locked (on) position. Depress PEDAL to allow starting of engine. Depress PEDAL to release park brake from locked (on) position.

Park Brake Knob-

Used to lift the park brake rod and engage with the clutch/brake linkage to secure the brake into the locked (on) position.

Used to allow starting of the engine if the mowing attachment is stopped (PTO. clutch/brake knob is pushed down) without the operator depressing clutch/brake pedal or being on the operators seat.

Used to allow the operator to leave the operating position with the engine running if the park brake is in the locked (on) position and the mowing attachment is also stopped (PTO. clutch/brake knob is pushed down).

Depress brake pedal fully, then lift the park brake KNOB into the locked (on) position and release the brake pedal, leaving the KNOB in the locked (on) position. Depress the clutch/brake pedal to release the park brake and let it return to the off position.

OPERATING INSTRUCTIONS CONT.

Seat Adjustment Lever-

Used to allow adjustment of the seat backwards or forwards to give the most comfortable operating position. Pull the LEVER left to unlock the seat slide mechanism, and move seat backwards or forwards until most comfortable operating position is reached, release LEVER and attempt to move the seat backwards or forwards slightly to allow the LEVER to return to the fully right position and to ensure the seat is locked in position.

Drive Pedal-

Used to control an infinitely variable ground speed between zero and maximum in forward or reverse. Also to select neutral. With engine running and clutch/brake pedal released push down on front of drive pedal to travel forward, push down on back of drive pedal to travel in reverse. When pressure is released from front or back of pedal it will return to neutral position.

Mowing Attachment Cutting Height Adjustment Lever-

Used to change the mowing attachment cutting height. To alter cutting height, lift lever slightly and depress button, move lever up to raise or down to lower the mowing attachment cut height, stop at desired cutting height and release button to lock at 1 of 10 height positions.

NOTE— Do Not mow in any direction on slopes beyond 15 degrees (1 in 3.75).

Transmission Pump By-Pass Lever-

Used to disengage the transmission to allow the mower to be pushed easily. Located at the front of the transmission and near the middle of the chassis. Move lever to back for normal operation or move lever forward for free wheel.

Fuel Tap Knob-

Used to shut off the fuel line to stop fuel flow to the engine when the tractor is transported or not in operation to reduce the likelihood of fuel leakage. Turn the KNOB clockwise $\frac{1}{4}$ of a turn from the on position to the off position to shut off the fuel line to stop fuel flowing to the engine. Turn KNOB anticlockwise $\frac{1}{4}$ of a turn from the off position to the on position to allow fuel to flow to the engine.

Oil Level Dipstick-

Used to indicate oil level in engine when engine is not running. (Refer to engine owners manual for instructions on checking engine oil level)

TO OPERATE

BEFORE

STOPPING:

See Engine Maintenance/ Instruction Sheet.

Check engine oil level, check fuel level, turn fuel tap on.

STARTING/

STARTING ENGINE

Cold Engine: To start engine, place speed control lever into choke position, ensure PTO switch is in the "off" position, park brake locked or clutch/brake pedal fully depressed, insert key in key switch, turn key all the way right to start (3rd) position, release key when engine has started.

Note: More than 15 seconds of continuous cranking can damage the starter motor. Short starting cycles give best starter motor life. Allow starter motor to cool for 2 minutes before attempting to restart engine. After engine starts gradually move speed control lever, out of choke position to obtain desired engine speed.

Hot engine:

To start engine, place speed control slightly past slow position, ensure PTO switch is in the "off" position, park brake locked or clutch/brake pedal fully depressed, insert key in key switch, turn key all the way right to start (3rd) position, release key when engine has started. Move speed control lever to obtain desired engine speed.

STOPPING ENGINE

When stopping engine, ensure PTO switch is in the off position, return speed control to fast position, lock park brake, turn key switch to the "off" (1st) position.

DRIVING

To Travel Machine Forward Or Reverse-

With engine running set speed control lever to obtain desired engine speed, $\frac{3}{4}$ to full speed for the best mowing finish and for engine and transmission cooling. Release park brake, let the clutch/brake pedal all the way out, apply downward pressure on front of drive pedal to travel forward, or apply downward pressure on back of drive pedal to travel in reverse. It is not necessary to apply foot brake before changing from forward to reverse or reverse to forward. The amount of pedal travel is used to control the ground speed, small downward travel will give a slow ground speed,

full downward travel will give a fast ground speed.

NOTE Use slower ground speed for traveling up and down slopes, turning, or mowing heavy growth.

Take care when reversing, always look in the direction of intended travel before changing direction.

To Stop Machine Travel-

Apply clutch/brake pedal fully, this will disconnect the drive belt to the transmission before the brake is activated.

MAINTENANCE INSTRUCTIONS

It is the owner's responsibility to ensure that all-periodical checks, necessary adjustments, services and repairs are carried out. Failure to do so may result in death, personal injury and/or property damage.

Before attempting any maintenance, stop engine, ensure mowing attachment blades have stopped rotating, disconnect spark plug lead from spark plug and ground it, disconnect battery at negative terminal, to prevent accidental starting.

Position machine on a flat level surface for maintenance.

Never alter factory setting of maximum engine R.P.M (3600).

Reference to the left or right side of the machine is determined by sitting in the operating position.

IMPORTANT: If operating in adverse conditions such as those mentioned below, change engine oil, air filter, lubrication and adjustments should be carried out at less time intervals than specified in this booklets maintenance schedule. Ensure machine has park brake engaged when attempting to start engine.

- Mowing in hot or wet conditions.
- Mowing in rough or dusty conditions.
- Mowing hilly areas or continuous heavy load conditions.

CHECK & ADJUST ENGINE OIL LEVEL - Refer to engine owners manual for correct method to check & adjust engine oil level.

CHANGE ENGINE OIL & OIL FILTER

Refer to engine owner's manual for correct method to change engine oil & oil filter.

CHECK ENGINE AIR CLEANER & FOAM PRE-CLEANER-

Refer to engine owners manual for correct method to check and service engine air cleaner & foam pre-cleaner.

CHECK BONNET SIDE MESH -

If mesh is more than one quarter blocked by debris clean mesh. Wipe mesh with hand, rag or brush to remove debris from mesh.

CHECK ENGINE ROTATING SCREEN Refer to engine owners manual for correct method to check and clean engine rotating screen /debris guard.

LUBRICATION OF MACHINE- Lubrication of machine must be carried out every 25 hours of operation or once a month, whichever occurs first. Lubricate at less time intervals when operated under adverse conditions.

OILING: A few drops of oil should be placed at the following points: Steering rod ends, mower suspension link rod end, height adjustment mechanism.

CHAIN: Use only chain lube for lubrication of the steering chain.

GREASE POINTS: Grease nipples are located on top of the front wheel stub axles.

GREASE STUB AXLES:

Clean grease nipple, use grease gun and general-purpose grease to force old grease from top and bottom of front axle bushes. If grease is not released from bottom of bush jack up front of machine and try again .

ENGINE TO TRANSMISSION VEE BELT ADJUSTMENT- Tension is automatically adjusted by the belt tensioning springs.

ENGINE TO CUTTER VEE BELT ADJUSTMENT- Tension is automatically adjusted by the belt tensioning springs.

TO ADJUST STEERING CHAIN- Adjust chain by loosening the two bolts which hold the steering idler shaft mounting bracket in position, slide rearwards to tension chain then retighten bolts.

CHECK CLUTCH OPERATION – With pedal in up position check for 3-4mm play in the disengage linkage slot and the disengagement arm pin (adjust after removing 'R' pin and washer) and turning linkage in or out to achieve correct play (replace 'R' pin and washer).

CHECK BRAKE OPERATION –

Apply Clutch/Brake pedal and set park brake, if mower can be pushed brake pad, brake spring, or brake linkage may need servicing.

CHECK OPERATION OF SAFETY SWITCHES:

STARTING Clutch/Brake switch

With PTO (power take off) switch in disengaged position (down/off) attempt to start engine without the clutch/brake pedal depressed. **Engine should not start.**

PTO switch

Sit on seat with the clutch/brake pedal fully depressed and PTO switch engaged (On), attempt to start engine. **Engine should not start.**

Key Switch

With PTO switch in down (disengaged/off) position & clutch/brake pedal fully depressed turn key switch to start position. **Engine should start.**

STOPPING

Seat switch

Sit on seat and start engine, engage cutter, (manual or electric control) and lift weight from seat.

Engine should stop.

Clutch/Brake switch

Sit on seat and start engine depress clutch/brake pedal and apply park brake, lift weight from seat.

Engine should continue to run.

Sit on seat with engine running and park brake off , clutch/brake pedal not depressed and lift weight from seat.

Engine should stop.

Key Switch

Sit on seat and start engine, turn key switch to stop position.

Engine should stop.

CUTTER BRAKE ADJUSTMENT- Automatically adjusted by permanent magnets on the electro magnetic clutch/brake.

CUTTER HEIGHT ADJUSTMENT- Stop engine, ensure mowing attachment blades have stopped rotating, disconnect spark plug lead from spark plug and ground it, disconnect battery at negative terminal, to prevent accidental starting. If the Mowing Attachment can not be positioned to give a satisfactory grass cut height using the available notches on the cut height mechanism, position the mower on a smooth level surface, lock the park brake on, and lower the Mowing Attachment to the notch above the desired cut height. Place 3 equal height spacers (that can support the mowing attachments weight) , of the desired height, under the mowing attachment one on each side at the lower front adjacent to the cut -out & one at the middle of the back and lower the Mowing Attachment onto them. Loosen the 2 short screws located together on the front of the rear suspension mount. Push the rear link rearwards until it stops and retighten the 2 screws. Lift the Mowing attachment off the spacers and remove the spacers and check the cut height is as desired and the deck is level to slightly higher (3–5 mm) at the back. Adjust height again if required.

REPLACE BLADES- Stop engine, ensure mowing attachment blades have stopped rotating, disconnect spark plug lead from spark plug and ground it, disconnect battery at negative terminal, to prevent accidental starting. Check condition of cutter disc remove the blade nut using a suitable spanner (if using a socket remove the blanking grommet to gain access to the blade nut) and replace all blades, bolts, nuts and washers to preserve balance, tighten blade nut to (36-40Nm). Do not over tighten. Re-fit blanking grommet if removed.

TO REMOVE MOWING ATTACHMENT –

Stop engine, ensure mowing attachment blades have stopped rotating, and spark plug lead is disconnected & grounded, disconnect battery negative terminal to prevent accidental starting, disconnect the belt tensioning spring (front left hand side of mowing attachment). Lower mowing attachment onto 20mm block front and rear. Remove cutter belt from engine pulley. Remove two M10 x 50mm bolts, nuts & washers from mower suspension link at rear of the mowing

attachment. Remove mowing attachment pivot pin lock screw and nut (6mm) and remove mowing attachment pivot pin. Remove the M8x35mm bolt from the cradle frame attachment bracket. Turn the front wheels a little to the left and twist the mowing attachment to the right and slide the deck from under the mower to the right side.

Re-assemble in reverse order. To assist in refitting mowing attachment pivot pin, raise the mowing attachment slightly. Refit mower suspension link & lifting links and M10x50mm bolts, nuts and washers. Refit cutter belt, connect belt tensioning spring and refit spark plug lead and battery terminal.

BATTERY MAINTENANCE- Batteries can be dangerous as they contain acids (corrosive chemicals), flammable vapours, large amounts of stored electrical energy, which may cause chemical burns, explosions or fires. Where goggles and a protective face guard. Remove jewellery/watches before handling the battery. Do not perform any battery maintenance where there are open flames or the possibility of sparks. Always work in a well ventilated area. Ensure the top of the battery is clean and dry (free of dirt and grime) as a dirty battery can discharge across the top of the battery casing. Inspect the terminals, screws and cables for breakage, damage or loose connections and they are clean, tight and free of corrosion. When not in use, a battery discharges by as much as 1% a day, more when the climate is warm. To make up for this loss, a boosting charge should be given once a month. Disconnect battery terminals (negative terminal first) to charge, then allow to stand minimum 1/2hr before re-connecting (negative terminal first). If a battery is not used for a period of more than three (3) months, the terminals should be disconnected and trickle charged at two (2) amps for two (2) hours once every three (3) months or before use. At the end of any maintenance ensure the battery is securely fastened in place, especially if it has been removed.

MAINTENANCE INSTRUCTIONS cont.

CHECK TYRE PRESSURES - Uneven pressure can give an uneven finish when mowing and overly low or high pressures may cause damage to tyres and/or tubes. The recommended pressure is: 170kPa (24 P.S.I.) Front. 100kPa (15 P.S.I.) Rear.

CLEANING MACHINE WITH WATER PRESSURE - Allow machine to cool down (min 2 hrs) before hosing down. Start engine and engage drive and cutting systems to clear water from pulleys and belts. Stop engine and allow machine to dry. Lubricate as required. Do not cover machine with plastic or vinyl type material.

CLEANING AND POLISHING PLASTIC BONNET & MUDGUARD - To keep scratches on bonnet & foot pan to minimum, do not rub or brush off with bare hands, use a soft cloth or a light flow of compressed air. For dirt, wash with

a steady stream of water only (no detergent), then blow off excess water with air. To polish remove excess dust or dirt. When surface is dry, spray on an automotive type plastic preservative and leave on for 30 to 60 seconds. Using a dry soft cloth (i.e. cheesecloth) wipe off to bring up lustre.

GENUINE SPARE PARTS - Always use Genuine COX Spare Parts. Use of non-genuine COX spare parts will void your warranty.

SAFETY FIRST -

The use of mechanical devices can cause injury or property damage if incorrect procedures are used. Please ensure all operators & users read & understand all safety instructions in this manual.

CHECK FOR LOOSE FASTENERS - TORQUE SETTINGS

MAINTENANCE SCHEDULE

BEFORE EACH USE

Check engine oil level, adjust if required
Check engine air cleaner & foam pre-cleaner, service if required
Check engine rotating screen/finger guard, clean if required
Check operation of safety switches, service if required
Check clutch/ brake operation, adjust if required
Check tyre pressures, adjust if required
Grease stub axles
Lubricate steering ball joints
Check for loose fasteners, tighten if required

Check mowing attachment cutter blades, bolts, nuts, housing, chute, grass catcher and guards for wear or damage, repair or replace if required
Lubricate as necessary

BEFORE EXTENDED STORAGE Change engine oil - Clean machine - Lubricate fully - Remove all fuel from engine, fuel lines & tank or add fuel stabiliser

EVERY 5 HOURS

Check engine oil level, adjust if required
Check engine air cleaner & foam pre-cleaner, service if required*

Check engine rotating screen/finger guard, clean if required*

***Service more often under dusty conditions, or where air borne debris is present**

FIRST MONTH OR 5 HOURS which ever occurs first

Change engine oil
Check engine air cleaner & foam pre-cleaner, service if required
Check engine rotating screen/finger guard, clean if required
Check for loose fasteners, tighten if required
Check clutch/ brake operation, adjust if required
Check operation of safety switches, service if required
Check tyre pressures, adjust if required

Grease stub axles
Lubricate steering ball joints (rod ends)
Check mowing attachment cutter blades, bolts, nuts, housing, chute, grass catcher and guards for damage, repair or replace if required

DATE / / HOURS.....DEALER.....

3 MONTHS OR 25 HOURS which ever occurs first

Change engine oil if operating under heavy load or high ambient temperature
Check engine air cleaner & foam pre-cleaner, service if required *
Check engine rotating screen/finger guard, clean if required *
Check battery condition, service if required
Check clutch/ brake operation, adjust if required
Check operation of safety switches and replace if required
Check tyre pressures, adjust if required
Grease stub axles *

Lubricate steering ball joints (rod ends)
Check for loose fasteners, tighten if required
Check mowing attachment cutter blades, bolts, nuts, housing, chute, grass catcher and guards for wear or damage, repair or replace if required

***Service more often under dusty conditions, or where air borne debris is present**

DATE / / HOURS.....DEALER.....

6 MONTHS OR 50 HOURS which ever occurs first

Change engine oil
If fitted clean engine exhaust spark arrester
Check engine air cleaner & foam pre-cleaner, service if req *
Check engine rotating screen/finger guard, clean if required *
Check clutch/ brake operation and pads for wear, adjust or replace if required
Check tyre pressures, adjust if required
Check operation of safety switches, service if required
Check belts for wear or damage, replace if required
Grease stub axles *
Lubricate steering ball joints (rod ends)
Check steering chain and sprockets for wear, adjust if required

Check mowing attachment electric clutch brake air gap, adjust if req.
Check mowing attachment electromagnetic clutch/brake for operation, service if required
Check for loose fasteners, tighten if required
Check battery condition, service if required
Check mowing attachment cutter blades, bolts, nuts, housing, chute, grass catcher and guards for wear or damage, repair or replace if required
#Replace Hydrostatic transaxle oil with 5W50 synthetic oil

*Service more often under dusty conditions, or where air borne debris is present
#Service if in commercial and /or heavy usage applications

DATE / / HOURS.....DEALER.....

9 MONTHS OR 75 HOURS which ever occurs first

Change engine oil if operating under heavy load or high ambient temperature
Check engine air cleaner & foam pre-cleaner, service if req *
Check engine rotating screen/finger guard, clean if required *
Check for loose fasteners, tighten if required
Check clutch/ brake operation, adjust if required
Check operation of safety switches and replace if required
Check tyre pressures, adjust if required

Grease stub axles *
Lubricate steering ball joints (rod ends)
Check battery condition, service if required
Check mowing attachment cutter blades, bolts, nuts, housing, chute, grass catcher and guards for wear or damage, repair or replace if required

*Service more often under dusty conditions, or where air borne debris is present

DATE / / HOURS.....DEALER.....

12 MONTHS OR 100 HOURS which ever occurs first

If fitted replace engine oil filter.
Change engine oil.
Check engine spark plug, clean, adjust, or replace if required.
If fitted clean engine exhaust spark arrester.
Check engine air cleaner & foam pre-cleaner, service if req *.
Replace engine air cleaner cartridge, service if required*.
Clean engine cooling system*.
Check clutch/ brake operation and pads for wear, adjust or replace if req.
Replace in-line fuel filter.
Check tyre pressures, adjust if required.
Grease stub axles *.
Lubricate steering ball joints (rod ends)
Check belts for wear or damage, replace if required.

Check operation of safety switches, service if required.
Check mowing attachment electromagnetic clutch/brake for operation, service if required
Check battery condition, service if required.
Check for loose fasteners, tighten if required
Check steering chain and sprockets for wear, adjust if required.
Check mowing attachment cutter blades, bolts, nuts, housing, chute, grass catcher and guards for wear or damage, repair or replace if required.

*Service more often under dusty conditions, or where air borne debris is present

DATE / / HOURS.....DEALER.....

15 MONTHS OR 125 HOURS which ever occurs first

Change engine oil if operating under heavy load or high ambient temperature.
Check engine air cleaner & foam pre-cleaner, service if required *.
Check engine rotating screen/finger guard, clean if required *.
Check operation of safety switches and replace if required.
Check clutch/ brake operation, adjust if required.
Grease stub axles *.
Lubricate steering ball joints (rod ends)

Check tyre pressures, adjust if required.
Check for loose fasteners, tighten if required.
Check battery condition, service if required.
Check mowing attachment cutter blades, bolts, nuts, housing, chute, grass catcher and guards for wear or damage, repair or replace if required.

*Service more often under dusty conditions, or where air borne debris is present

DATE / / HOURS.....DEALER.....

18 MONTHS OR 150 HOURS which ever occurs first

Change engine oil.
If fitted clean engine exhaust spark arrestor.
Check engine air cleaner & foam pre-cleaner, service if req*.
Check engine rotating screen/finger guard, clean if req*.
Check clutch/ brake operation and lining for wear, adjust or replace if req.
Check operation of safety switches, service if required.
Check tyre pressures, adjust if required.
If fitted check mowing attachment brake pad for wear, replace if required.
Check battery condition, service if required.
Check for loose fasteners, tighten if required.

Check belts for wear or damage, replace if required.
Check steering chain and sprockets for wear, adjust if required.
Grease stub axles*.
Lubricate steering ball joints (rod ends)
Check mowing attachment electric clutch brake air gap, adjust if req.
Check mowing attachment cutter blades, bolts, nuts, housing, chute, grass catcher and guards for wear or damage, repair or replace if req

*Service more often under dusty conditions, or where air borne debris is present

DATE / / HOURS.....DEALER.....

21 MONTHS OR 175 HOURS which ever occurs first

Change engine oil if operating under heavy load or high ambient temperature.
Check engine air cleaner & foam pre-cleaner, service if required*.
Check engine rotating screen/finger guard, clean if required*.
Check clutch/ brake operation, adjust if required.
Check operation of safety switches and replace if required.
Check tyre pressures, adjust if required.
Grease stub axles*.

Lubricate steering ball joints (rod ends)
Check battery condition, service if required.
Check for loose fasteners, tighten if required.
Check mowing attachment cutter blades, bolts, nuts, housing, chute, grass catcher and guards for wear or damage, repair or replace if required

*Service more often under dusty conditions, or where air borne debris is present

DATE / / HOURS.....DEALER.....

24 MONTHS OR 200 HOURS which ever occurs first

If fitted replace engine oil filter. Change engine oil.
Check engine spark plug, clean, adjust, or replace if required.
If fitted clean engine exhaust spark arrestor.
Check engine air cleaner & foam pre-cleaner, service if req*
Check engine air cleaner cartridge, service if required.
Clean engine cooling system*.
Replace in-line fuel filter.
Check clutch/ brake operation and pads for wear, adjust or replace if req.
Check operation of safety switches, service if required.
Check tyre pressures, adjust if required.
Grease stub axles*
Lubricate steering ball joints (rod ends)

Check steering chain and sprockets for wear, adjust if req
Check belts for wear or damage, replace if required.
Check mowing attachment electromagnetic clutch/brake for operation, service if required
Check battery condition, service if required
Check for loose fasteners, tighten if required
Check mowing attachment cutter blades, bolts, nuts, housing, chute, grass catcher and guards for wear or damage, repair or replace if required.
Replace Hydro oil with 5W50 synthetic oil

*Service more often under dusty conditions, or where air borne debris is present

DATE / / HOURS.....DEALER.....

27 MONTHS OR 225 HOURS which ever occurs first

Change engine oil if operating under heavy load or high ambient temperature.
Check engine air cleaner & foam pre-cleaner, service if req
Check engine rotating screen/finger guard, clean if req*.
Check clutch/ brake operation, adjust if required.
Check operation of safety switches and replace if req.
Check tyre pressures, adjust if required.
Grease stub axles*.

Lubricate steering ball joints (rod ends)
Check battery condition, service if required.
Check for loose fasteners, tighten if required.
Check mowing attachment cutter blades, bolts, nuts, housing, chute, grass catcher and guards for wear or damage, repair or replace if req.

*Service more often under dusty conditions, or where air borne debris is present

**We are proud that you have purchased a Cox product and urge you to follow these instructions to obtain the maximum life for your machine.
If in doubt check with your supplier.**

COX INDUSTRIES MOWER WARRANTY POLICY

DEFINITIONS:

"Commercial Use" means all uses other than Domestic use, including any use that is income producing, rental, or is in relation to use in schools, by government departments or charity operators.

"COX INDUSTRIES" means Cox Industries (Australia) Pty Ltd ACN 050 991 038.

"Dealer" means an authorised COX INDUSTRIES dealer a list of which can be found on our website: www.coxmowers.com.au or freecall us on 1800 330 444.

"Domestic Use" means use for a personal, residential or household (property) purpose.

"Mower" means any ride-on mower manufactured by COX INDUSTRIES.

"Parts" means all parts that can be found in a Mower.

"Warranty Period" means:

- 1) for Domestic Use, a period of two (2) years; or
- 2) for Commercial Use, a period of six (6) months, from the original date of purchase.

NEW MOWER:

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Nothing in this Warranty purports to modify or exclude the conditions, warranties and undertakings, and other legal rights, under the Australian Consumer Law. This Warranty gives you additional protection for your Mower, and identifies a preferred approach to resolving warranty claims which will be quickest and simplest for all parties, subject to the exclusions, terms and conditions below.

WARRANTY PERIOD:

COX INDUSTRIES warrants in respect of each new Mower sold that, subject to the exclusions below, for the Warranty Period COX INDUSTRIES or a Dealer will repair or replace free of charge any Parts found to be defective in materials or workmanship under normal use and operating conditions. Other than for major failure, it is at COX INDUSTRIES sole discretion as to whether the Mower or Part is repaired or replaced.

MOWER PARTS INSTALLED DURING NEW MOWER WARRANTY PERIOD:

Warranty coverage for Parts installed during the new Mower Warranty Period shall consist of the remainder of the new mower Warranty Period or ninety (90) days, whichever ever is greater, provided the installation is performed by an authorised Dealer.

TO CLAIM THE WARRANTY:

To make a claim under this Warranty, please bring or send the Mower to an authorised Dealer with a copy of your proof of purchase of the Mower. A claim under this Warranty is not formally made unless and until that proof of purchase is provided. This does not detract from your statutory rights.

WARRANTY REGISTRATION:

The warranty registration card must be completed by the Dealer with the customer at the time of purchase and returned to COX INDUSTRIES within 14 days.

This Warranty is transferable to a subsequent owner of a Mower, in the event of the sale of that product, provided that COX INDUSTRIES is informed in writing within a reasonable time of the sale of the subsequent owner's name and contact details, such notice to be provided to COX INDUSTRIES. The notice should identify the name of the previous owner of the Mower, place and date of purchase, model, make and serial number of the Mower. The effective transfer of this Warranty does not otherwise alter the terms of this Warranty in any way.

WARRANTY EXCLUSIONS:

This Warranty does not cover:

- 1) the costs of rental of another machine or related equipment while repairs are in progress;
- 2) telephone, facsimile or other related communication expenses.
- 3) transportation and insurance charges during transportation of failed Mower or any part thereof;
- 4) the labour, parts, mechanical adjustments or lubricant costs which, in the judgement of COX INDUSTRIES or their Dealer, should have been made as standard maintenance according to the COX INDUSTRIES maintenance schedule;
- 5) the replacement of or service costs relating to replacing and maintaining consumable parts which have ceased working through normal wear and tear such as, but not limited to, normal maintenance parts such as mower discs, blades, bolts and nuts, vee belts, bearings, chains and clutch cones;
- 6) any damage or defect caused by alteration, modification, fitment of a non-genuine part or attachment not approved by COX INDUSTRIES or repair, modification or work carried out on the Mower other than by a Dealer;
- 7) any defect caused by misuse, negligence, accidents or failure to carry out proper maintenance procedures;
- 8) damage caused by continued operation of the machine after it is known to be defective;
- 9) any other expenses incurred by the consumer in making the warranty claim;
- 10) damage caused by incorrect or improper operation (including racing or similar activities), maintenance or not following the instructions or maintenance requirements of the Mower in accordance with the instructions provided with the Mower;
- 11) damage caused by failure to clean or improper cleaning of the product;
- 12) damage caused by adverse external conditions such as thunderstorm activity, acts of God, acts of terrorism, damage caused by vermin, or any other act or circumstance beyond COX INDUSTRIES' control; or
- 13) damage caused by exposure to excessive heat, moisture or dampness, or exposure to abnormally corrosive conditions.

For the avoidance of any doubt, any and all warranties or conditions which are not guaranteed under the Australian Consumer Law or the Australian Competition and Consumer Regulations 2010 and which are not expressly included in this Warranty as additional warranties or conditions are excluded.

To the extent applicable by law, COX INDUSTRIES will not accept liability for costs of labour, postage, cartage or delivery to replace faulty materials or parts, or for any loss, damage or accident directly, indirectly, or consequently suffered by the purchaser, operator or any other person or property as a result of such faults whether due to defective materials or workmanship or otherwise.

Due to COX INDUSTRIES on-going commitment to product improvement, we reserve the right to change at any time, product specifications, configurations and company policies.

Specifications

Model No A16915G COX Stockman 4500 Ride-on Lawn Tractor

Product Code	CS45H20B35 CS45H20B42	20HP (14.9Kw), Hydrostatic Drive, 890 mm (35") Side Discharge Mowing Attachment 20HP (14.9Kw), Hydrostatic Drive, 1055 mm (42") Side Discharge Mowing Attachment	
Dimensions, Mass, Capacity		CS45H20B35	CS45H20B42
Length Width	Lawn Tractor	1860mm	1860 mm
	Lawn Tractor	889 mm	889mm
	Inc Mowing Attachment Deflector Down	1110 mm	1321mm
	Inc Mowing Attachment Deflector Up	985 mm	1196mm
Height		1130 mm	1130 mm
Wheel Base		1326 mm	1326 mm
Front Track [13x6.50-6 Tyres]		726 mm	726 mm
Rear Track [18x9.50-8 Tyres]		656 mm	656 mm
Dry Mass	Lawn Tractor	202.5 kgs	202.5 kgs
	Mowing Attachment 35"	31.5 kgs	
	Mowing Attachment 42"		47.5 kgs
	Total	234 kgs	250 kgs
Fuel Tank Capacity			10.5 Litre
Engine Oil Capacity Including Oil Filter			1.9 Litre
Engine Design & Performance			
Model		Briggs & Stratton 40N877 0025B1	
Type:- Petrol, 4 Stroke, Air Cooled, Vertical PTO, 25.4 mm [1"] Shaft, Fuel Pump, Electric Start		Intek	
Cylinder Configuration		Twin Cast Iron Sleeve	
Valve Type		Overhead	
Displacement		656 cm3	
Bore x Stroke		75.4 mm x 73.4 mm	
Maximum Rated Gross Power to SAE J1940 & J1995 @3600		14.9 kW [20.0 hp]	
Rated Engine Speed (No Load)	Maximum	3600 RPM	
	Idle	1800 RPM	
Alternator Capacity (12 Volt DC)		9 Amps	
Dry Mass		36.8 kg	
Transaxle Design & Performance			
Model & Type:- Hydrostatic Fluid Drive through Gear Transmission & Differential + Hydrostatic Bypass Disengagement + Internal Wet Disk Brake + External Reservoir Tank		Tuff Torq K46DR	
Ground Speed (Infinitely Variable)	Forward	0-11.4 km/h	
	Reverse	0-6 km/h	
Lubrication Capacity:-		2.3 Litres	
Dry Mass		12.5 kg	
Mowing Attachment Design & Performance		CA17014E	CA17115G
Type: Engine PTO Shaft Mounted Electromagnetic Clutch/Brake, Spring Tensioned, Single V Belt, 4 Parallel Link Points (3 Adjustable).			
1 Spindle, Right Side Discharge, 2 Swing Back Blades		890mm (35")	
2 Spindle, Right Side Discharge, 4 Swing Back Blades			1055 mm [42"]
Anti-scalp Roller		1 optional adjustable	4 Adjustable
Cut Height Range (10 Position)		15-85mm	15-85mm
Miscellaneous		CS45H20B35	CS45H20B42
Minimum Uncut Grass Diameter (Left Turn)		1560mm	1385mm
Maximum Grass Cut per Hour		10000m2	12000m2
Minimum Turning Diameter (Inside Back Tyre)	Left Turn	1200mm	1200mm
	Right Turn	1200mm	1200mm
Battery (12 Volt Maintenance Free)		MFU1	MFU1
Fuse (12 Volt) Blade Type		15 Amps	15 Amps
Maximum Trailer Gross Weight		250 kg	250 kg
Maximum Trailer Hitch Point Load		10 kg	10 kg
Maintenance		CS45H20B35	CS45H20B42
Fuel		Unleaded Petrol, Regular or Premium or E10	
Engine Oil (above + 4"C)		SAE 30 A.P.I. "SF", "SG", "SH", "SJ"	
Transaxle Oil		Initial top up SAE 10W-30 A.P.I. Class "CD" replace with 5W50 synthetic	
Spark Plug		Champion XC92YC Gap 0.76 mm	
Mower Blades & Fasteners Part No		SKIT54N	KIT259 (qty 2)
Drive Belt Cox Part No		V68	V68
Cutter Belt Cox Part No		V66	V69

DIMENSIONS - CS45H20B35
